MAKS FAN COIL TABLET

GENERAL DESCRIPTION

MAKS FAN COIL TABLET is a slow dissolving biocide tablet scientifically developed to control slime forming bacteria and other undesired biological growths such as fungi, algae, mildew, virus, etc... in air conditioning systems.

PRINCIPAL USES

MAKS FAN COIL TABLET is used as part of a planned maintenance program for air handling units in industrial, commercial and medical establishments, hotels, public and private buildings to reduce the risk of microbial based health risks.

PRODUCT BENEFITS

- Prevents biological contamination in air conditioning systems and minimizes potential health risks.
- Removes unpleasant odors.
- Reduces maintenance costs.
- Reduces the risk of overflowing and damage to furnishings.
- Provides extended protection to systems with its slow dissolving structure.
- Easy to use and handle due to its tablet form.

BIMAKS is a leading company in providing high performance chemicals, for the water treatment industry.

We aim to provide our customers the most updated products, reliable technical service and efficient logistical support through our technical research and business development activities.
